FIELD REQUIRMENTS IN ECONOMETRICS

Major Field:

The "Major Field" requirement consists of three courses beyond the first year econometrics requirements, as well as a field exam offered in January and June of each year. The three courses would include Econometrics III or IV (or, as recommended, both). The remaining course (or two courses) must be selected from the following: econometrics topics course to be selected in consultation with the econometrics faculty (provided it is offered in that year); or either Applied Micro Econometrics, Applied Macro Econometrics, Empirical Economic Modeling I or II; or a course in another department to be selected in consultation with the econometrics faculty. The field exam will be based on the material of Econometrics I, II, and either Econometrics III or IV as specified by the student.

Minor Field:

The "Minor Field" requirements consist of two courses beyond the first year econometrics requirements. At least one of these courses must be Econometrics III or IV. If only one of these two courses is taken, the remaining course must be selected from the following: econometrics topics course to be selected in consultation with the econometrics faculty (provided it is offered in that year), Applied Micro Econometrics, Applied Macro Econometrics, Empirical Economic Modeling I or II, or a course in another department to be selected in consultation with the econometrics faculty. Student must earn an average grade of B+ or better in the two courses beyond the first year courses, or pass the field exam.
